# Toys

## Key Facts

Toys have existed for thousands of years. They were made out of the materials that were available at the time. Even stones and string have been made into toys.

Toys were mainly made of wood, paper and metal during the Victorian age.

Rich Victorian children played with toys such as clockwork trains, rocking horses, tea sets and dolls. Poorer children played with homemade toys such as peg dolls, wooden boats and rags stuffed with sawdust to make balls or toy animals.

Modern toys are mainly made of plastic. This is because it is usually safer and easier to make things with.

Many modern toys use electricity to work. Computers and consoles were invented in the 20<sup>th</sup> century.
